

The background features a dark, textured central area framed by torn, off-white paper at the top and bottom. Dried, light-colored flowers with thin stems are placed in the corners: a large cluster in the top-left and a smaller one in the bottom-right.

BUSINESS RULES

- An artist may have multiple artworks and an artwork has a single artist.
- An artwork can be ordered and there can be multiple artworks in an order.
- A customer may place multiple orders but one order belongs to one customer.
- An exhibition may have multiple artworks displayed.

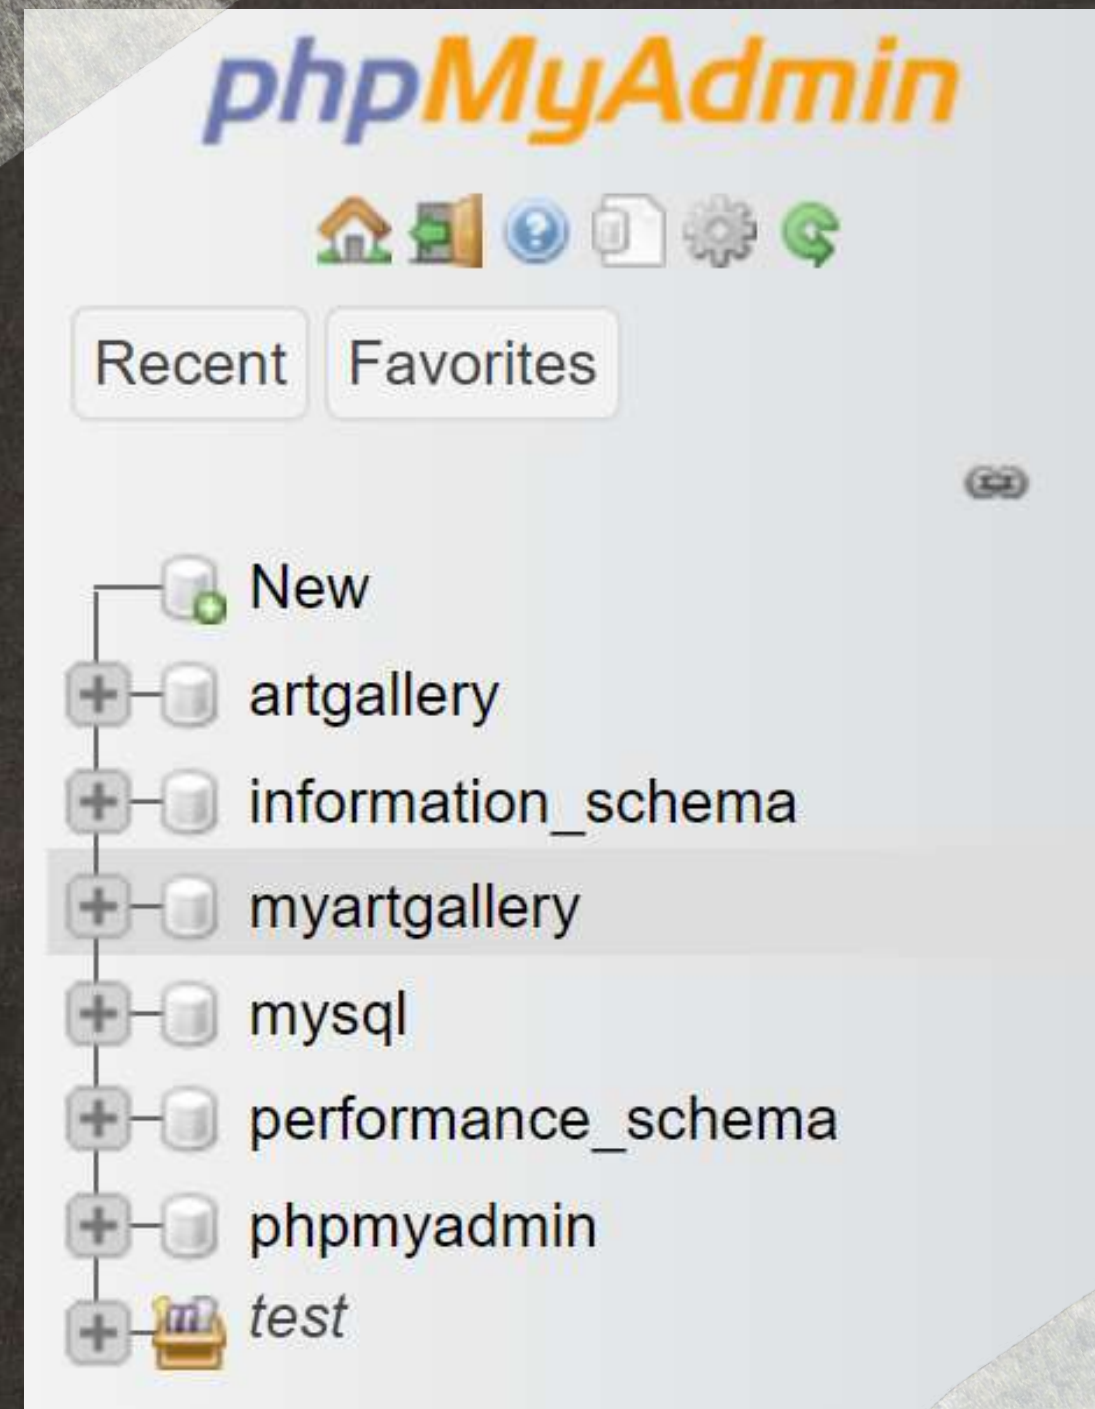

ERD

DATABASE

phpmyadmin

Made database on
phpmyadmin, a tool
for handling the
administration of
MySQL over the
Web

FRONT-END

html

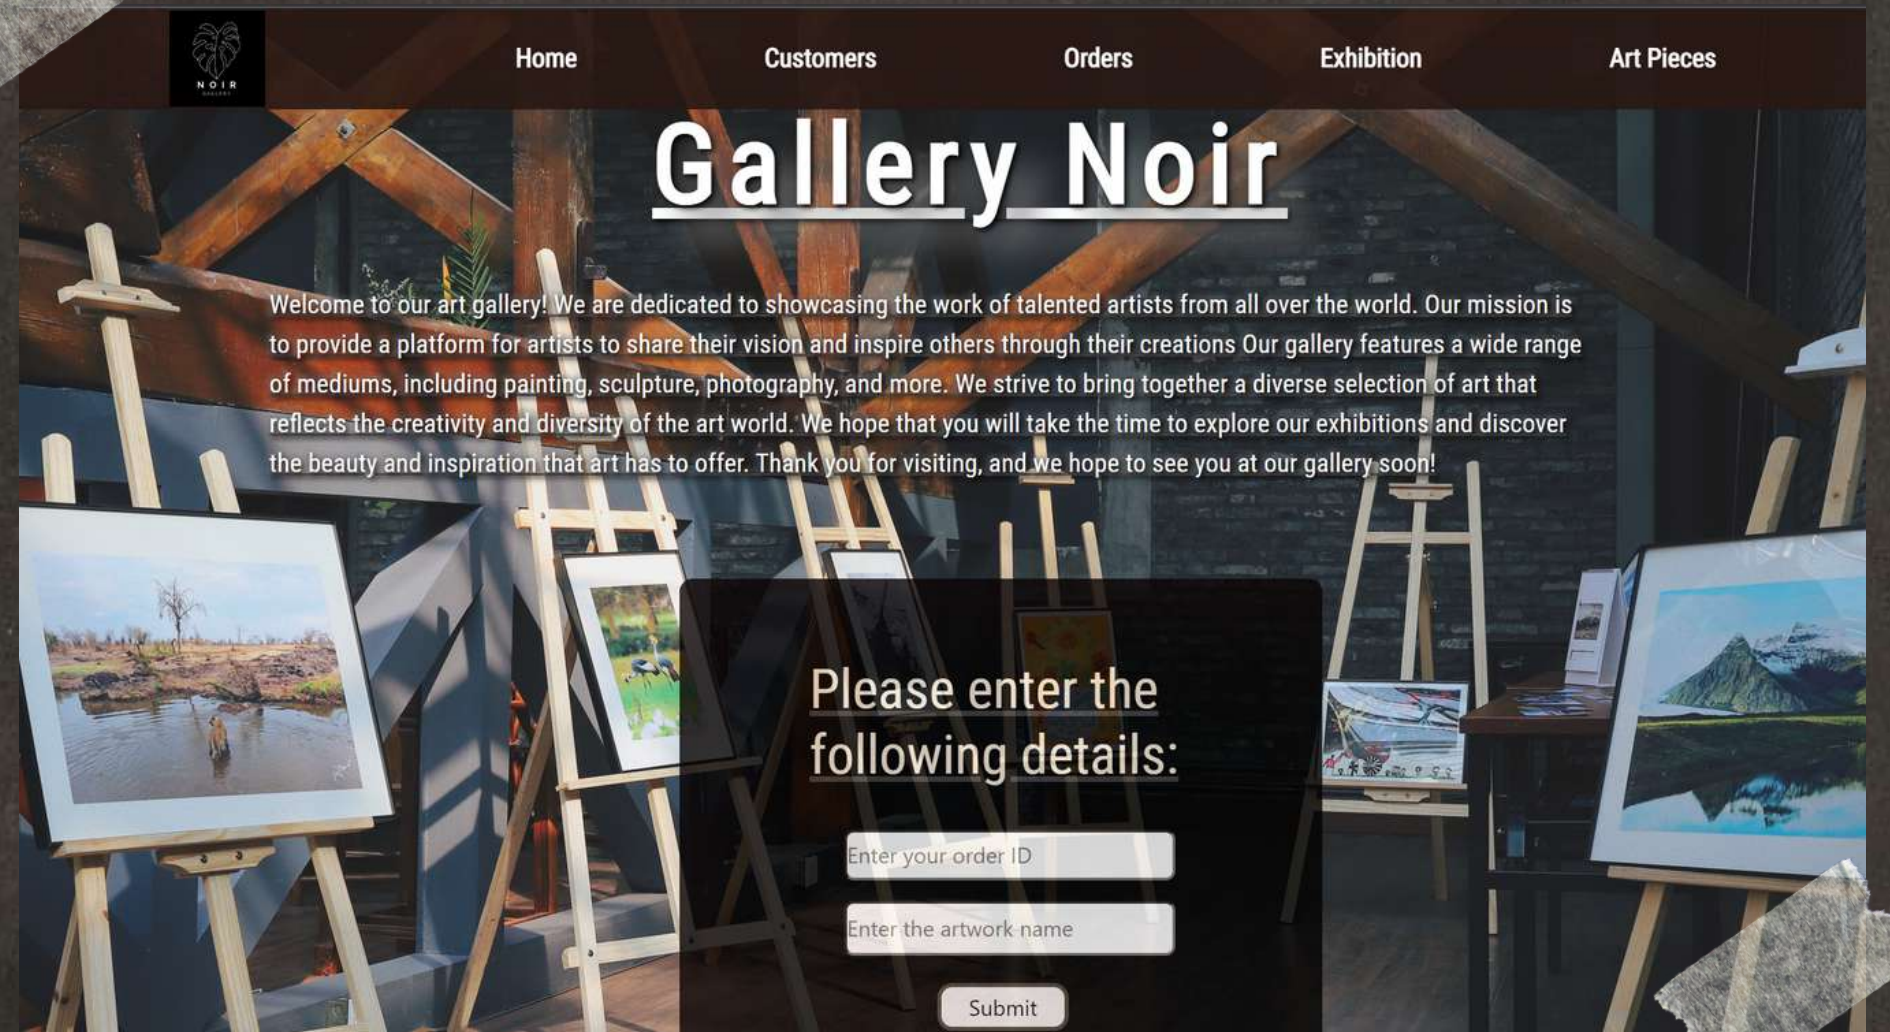

Used html to
make the
webpages

CSS

Used css for formatting
webpage

php

Used php to
establish
connection of
webpage with
database

TRIGGERS

Customer Liking

As soon as a customer places an order, update the customer liking

```
2 CREATE TRIGGER cust_like
3     AFTER INSERT
4     ON orderarts FOR EACH ROW
5 BEGIN
6     UPDATE customer c
7 SET c.customer_liking = (
8     SELECT a.typeofart
9     FROM artwork a
10    INNER JOIN orderarts oa ON a.art_title = oa.art_title
11    INNER JOIN orders o ON oa.order_id = o.order_id
12   WHERE o.customer_id = c.customer_id
13   GROUP BY a.typeofart
14   ORDER BY COUNT(a.typeofart) DESC
15   LIMIT 1
16 );
17 END$$
```

TRIGGERS

Customer Spendings

As soon as a customer places an order, update the customer liking

```
1 CREATE TRIGGER customer_spending
2     AFTER INSERT
3     ON orderarts FOR EACH ROW
4 BEGIN
5     update customer set total_spendings = (
6     SELECT SUM(orders.total_price)
7     FROM orders
8     where orders.customer_id = customer.customer_id
9     GROUP BY orders.customer_id);
10 END$$
```

TRIGGERS

Order Price

As soon as an order is placed, calculate its price

```
1 CREATE TRIGGER order_total
2     AFTER INSERT
3     ON orderarts FOR EACH ROW
4 BEGIN
5     update orders set total_price = (
6 SELECT SUM(artwork.price)
7 FROM artwork, orderarts
8 where orderarts.art_title = artwork.art_title and orders.order_id = orderarts.order_id
9 GROUP BY orderarts.order_id);
10 END$$
11 |
```
